

Adaptive typing practice for schools.

Private, engaging, easy to roll out.

— EASY ONBOARDING

- Students join with a simple **6-character class code**
- **No student email required** - username and password only
- New registrations appear in your **approval list**
- **Teacher dashboard** keeps onboarding and roster control in one place

— ASSIGNMENTS & DASHBOARDS

- Assign exercises to **one or more classes**
- Set optional **due dates** and **time limits**
- See **class averages**, daily activity, and completion at a glance
- Drill down into students with **per-key heatmaps** and **WPM trends**
- Reset passwords and manage access directly from the dashboard

— PROGRESS & MOTIVATION

- **Per-key heatmaps** and **WPM trends** make improvement visible
- **Speed tests**, achievements, and visible progress support motivation
- **Adaptive practice** keeps students challenged without overwhelming them
- **19+ languages** support multilingual classrooms and language programs

— WORKS ON SCHOOL DEVICES

- Runs in any **modern browser** - nothing to install on school devices
- Works on **Chromebooks**, laptops, and tablets
- Signed-in students can **sync progress** between school and home
- **Desktop app** available for offline environments

— ZERO STUDENT TRACKING

- **No analytics**, no session recordings, no third-party tracking
- Student accounts need only **username and password**
- **Role-based access** separates students, teachers, and admins
- **GDPR-compliant by design** for institutional use
- Data hosted in **Frankfurt, Germany (EU)**

— SSO & ACCESS MANAGEMENT

- Connect your identity provider via **OpenID Connect**
- Students and teachers sign in with **existing school accounts**
- Switch between classes from a **single teacher dashboard**
- **Organization admins** can oversee classes and teachers centrally

— CUSTOM EXERCISE CREATION

- Create exercises with your own **curriculum texts**, passages, or vocabulary
- Assign one exercise to **one or more classes** at once
- Track **completion per student** from the dashboard
- Use **time limits** and due dates to structure practice

— ACCESSIBILITY & LAYOUTS

- Supports **QWERTY**, **AZERTY**, **QWERTZ**, **Dvorak**, **Colemak**, and more
- **Auto-detection** means zero configuration for students
- **Visual keyboard hints** help beginners learn proper finger placement
- Students can use **dark mode** and customizable themes

What Sets TypiTrain Apart

STUDENT EXPERIENCE

- **Adaptive practice** for weak keys and finger positions
- **Story mode**, speed tests, and achievements
- **19+ languages** and multiple keyboard layouts

ROLE-AWARE MCP SERVER

- **Teacher and admin tools** with role-based access control
- Create assignments, approve students, and **reset passwords**
- Pull class analytics into **ChatGPT**, **Claude**, and other MCP-compatible assistants
